

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PLATE 227.

PLATE 227.

1. Namu, German Hydrog., No. 113; scale five miles to the inch.
2. Kwajalong, scale thirteen miles to the inch.
3. Taongi, scale eight miles to the inch.
4. Wotje Island (Wotje), scale one mile to the inch.
5. Pingelap, Carolines (A. Chart 772), scale one and one-fourth miles to the inch.
2-4 from German Hydrog. Bureau, No. 113.

"Albatross" Tropical Pacific Ex Coral Reefs, PLATE 227.

PLATE 228.

1. Wotje, German Hydrog., No. 113 ; scale six miles to the inch.
2. Jaluit, Southeast Pass, corrected by officers of the " Albatross," scale one-half mile to the inch.
3. Likiep, corrected by officers of the " Albatross," scale nine miles to the inch.
4. Arhno, corrected by officers of the " Albatross," scale five miles to the inch. **An excellent sketch of Arhno has just been published by the German Hydrographic Bureau (1902).**

2-4 from German Hydrog. Bureau, No. 113.

PLATE 229.

PLATE 229.

Kusaie, or Ualan, Carolines, from A. Chart 878, scale one and one-fourth miles to the inch.

Coral Reefs, PLATE 229.

PLATE 230.

Ponapi and the Andema Islands, from A. Chart 981, scale four and one-fourth miles to the inch.

PLATE 231.

Truk and the Royalist Islands, from A. Chart 982, scale seven miles to the inch.

TRUK or HOGOLU ISLANDS

PLATE 232.

PLATE 232.

Track of the "Albatross" west of Ponapi, through Truk to Guam.

PLATE 233.

1. Namonuito, from A. Chart 772, scale twelve miles to the inch.
2. Feys, or Tromelin Island, from A. Chart 772, scale three fourths of a mile to the inch.
3. Losap, from A. Chart 982, scale two miles to the inch.
4. Guam, from A. Chart 1748, scale six miles to the inch.
5. Rota, from A. Chart 1748, scale three miles to the inch.

PLATE 234.

PLATE 234.

Geological Chart of the islands in the tropical Pacific:

Yellow, coral reefs, underlying base not known.

Blue, volcanic islands.

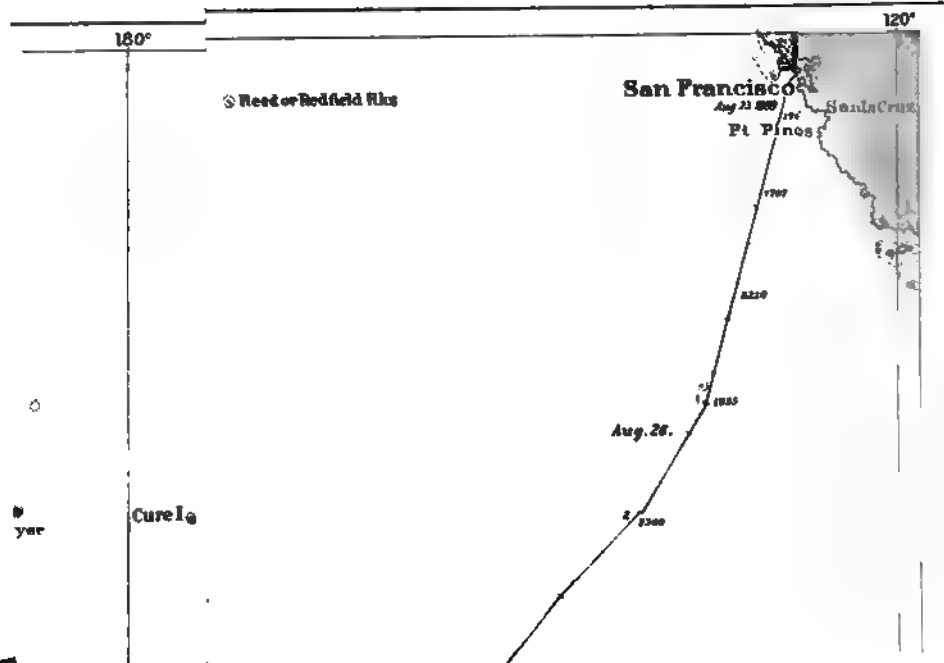

Carmine, elevated limestones.

Blue and carmine, volcanic islands surrounded by reefs, partly elevated.

Green, coral reefs, probably underlaid by rocks of nearest land.

Blue and yellow, volcanic islands surrounded by encircling reefs.

CORAL REEFS, PLATE 234.

San Francisco
Aug

PLATE 235.

Bora Bora. Drawn by J. H. Emerton, from sketches by A. Agassiz and A. G. Mayer.

PLATE 236.

PLATE 236.

Pinaki (Whitsunday). Drawn by J. H. Emerton, from sketches by A. Agassiz and A. G. Mayer.
